

**OPPOSITION Response to HB 3242**  
**Creating a domestic violence registry**  
**March 8, 2025**

House Judiciary Committee:

[West Virginians for Rational Sexual Offence Laws \(WVRSOL\)](#) is a West Virginia non-profit association and an affiliate of the [National Association for Rational Sexual Offence Laws \(NARSOL\)](#), which advocates for society's segment that is adversely affected by the sex offender registry. We help families impacted by the registry, seek ways to maintain and improve public safety, recommend prudent use of state funding in this area, and work to ensure that proposed legislation is constitutional.

WVRSOL **opposes** HB 3242 because registries have proven unproductive; consequently, one must assume that the primary purpose of a new domestic abuse registry is, simply put – shaming. No other conclusion is possible.

**HB 3242 – proposes the creation of a publicly accessible domestic abuser registry.**

1. The updates proposed to section §15-2C-1 is to add a new section §15-2C-2a, a domestic abuse registry, which significantly expands the use of shaming registration in West Virginia. Along with the Sex Offense registry, the proposed Domestic Abuser registry (HB 2366), and now the proposed Domestic Abuser registry (HB 3242) – all of which purport public safety; however, in effect, do nothing other than shame offenders. (Kaso, Philip, 2025)

**Opposed to: expanded use of public shaming registries**

1. According to the Safety Net Project, HB 3242 will not improve public safety and have potentially harmful consequences.

Domestic violence continues to be an epidemic that requires comprehensive and effective responses that will hold offenders accountable, protect victims, and create real prevention. A domestic violence offender registry has many potentially harmful consequences and, regardless of the intended goals, is not a tool for primary prevention. To truly prevent abuse, we need to change social norms that allow and even condone one partner choosing to abuse another partner through power and control. (Offender Registries: Potential Unintended Consequences of Domestic Violence Offender Registries, n.d.)

2. Registries do not work – period, so why are we creating another doomed-to-fail registry?

The vast majority of Americans believe sex offender registries make their communities safer, according to polls. A growing body of research, however, suggests otherwise. A long list of studies using decades of data have found no significant evidence that registries prevent sex crimes. (Bebernes, 2022)

A new study of ours shows that these policies are not effective in deterring crime or protecting citizens. SORN policies demonstrate no effect on recidivism. This finding holds important policy implications given the extensive adoption and net-widening of penalties related to SORN. (Zgoba & Mitchell, 2023)

3. HB 3242 creates and passes a non-funded mandate from state to local county prosecuting attorneys in all 55 counties, where it will get mixed implementation, mixed enforcement, and undoubtedly mixed support.
4. While HB 3242 creates a "private" "confidential" upon request registry, it is still publically open and accessible upon request by any citizen. Once established, the pressure to publicize said registry will also be prevalent—it's a slippery slope.

WVRSOL supports legislation that works to reduce abuse and sexual offenses, help children and families, and improve public safety. Unfortunately, HB 3242 does none of these things. Therefore, we **oppose** and respectfully urge the House, its members, and the House Judiciary Committee to **reject HB 3242**.

Sincerely,

*Philip W. Kaso*
